Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133).
- Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Election/Restrictions

1. Applicant's election of Group I (claims 1-18 and 28-38) in Paper No. 6 is acknowledged. Because applicant did not distinctly and specifically point out the supposed errors in the restriction requirement, the election has been treated as an election without traverse (MPEP § 818.03(a)).

Drawings

2. Figure 1 should be designated by a legend such as --Prior Art-- because only that which is old is illustrated. See MPEP § 608.02(g). A proposed drawing correction or corrected drawings are required in reply to the Office action to avoid abandonment of the application. The objection to the drawings will not be held in abeyance.
3. The drawings are objected to as failing to comply with 37.CFR 1.84(p)(4) because reference character "2" has been used to designate both image plane (page 6, line 19) and focal plane (page 6, line 21). A proposed drawing correction or corrected drawings are required in reply to the Office action to avoid abandonment of the application. The objection to the drawings will not be held in abeyance.

Specification

4. The abstract of the disclosure is objected to because it contains more than 150 words. Correction is required. See MPEP § 608.01(b).
5. The disclosure is objected to because of the following informalities:
 - a. In page 4, line 23, please provide updated information of U.S. Application Serial No. 09/507,559;

Art Unit: 3737

- b. In page 5, line 29, please provide updated information of U.S. Application Serial No. 09/589,863;
 - c. In page 8, line 1, it appears that "first, second, and third chambers 130, 133, and 134, respectively" should be changed to -- first, second, and third chambers 133, 134, and 130, respectively.
- Appropriate correction is required.

Claim Objections

- 6. Claim 33 is objected to because of the following informalities: it appears that in line 1 of the claim "system" should be changed to -- method --. Appropriate correction is required.

Claim Rejections - 35 USC § 103

- 7. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

- 8. This application currently names joint inventors. In considering patentability of the claims under 35 U.S.C. 103(a), the examiner presumes that the subject matter of the various claims was commonly owned at the time any inventions covered therein were made absent any evidence to the contrary. Applicant is advised of the obligation under 37 CFR 1.56 to point out the inventor and invention dates of each claim that was not commonly owned at the time a later invention was made in order for the examiner to consider the applicability of 35 U.S.C. 103(c) and potential 35 U.S.C. 102(e), (f) or (g) prior art under 35 U.S.C. 103(a).

Art Unit: 3737

9. Claims 1-3, 9, 28-29, and 33 are rejected under 35 U.S.C. 103(a) as being unpatentable over Garlik et al. (US 6,353,576). Garlik teaches all the limitations of the claimed subject matter except for mentioning specifically that the ultrasonic imaging system comprises three tanks filled with ultrasonic transmissive fluid. Garlik teaches in Fig 2, a single tank filled with ultrasonic transmissive fluid (water). At the time of the invention, it would have been obvious to an ordinary skill in the art to add the second and third tanks filled with ultrasonic transmissive fluid in order to improve ultrasonic holographic imaging method and system. The specific limitations of the polystyrene and TPX are well known in the art of ultrasonic holographic imaging.

Allowable Subject Matter

10. Claims 4-8, 10-18, 30-32, and 34-38 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

11. The following is a statement of reasons for the indication of allowable subject matter: none of the prior art, alone or in combination teaches the claimed features recited in claims 4-8, 10-18, 30-32, and 34-38.

Conclusion

12. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Ali Imam whose telephone number is 703-305-0028. The examiner can normally be reached on Mon. - Th., 8:00- 6:00.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Marvin Lateef can be reached on 703-308-3256. The fax phone numbers for the
